Dear Charlie:

We reluctantly agreed last week to your suggestion to appear (on a "hurry up" basis) before your Environmental Committee September 2 to talk about KDP's plans related to Captain Sam's but, honestly, we need to gather more data if we're going to deliver the type of comprehensive, professional, well-researched, across-the-board Report that we'd like and prefer to present.

Thus, regrettably, we'll have to meet some other time, as we need to begin work on a comprehensive Master Plan. That process could take quite a while.

At the appropriate time we'll check with you.

We'll have a more comprehensive approach and hopefully the media and others might have a better handle on accurate facts at a later date.

Regards,
Leonard
